INTRODUCTION

The 2023 New York State Child Care Market Rate Survey (Market Rate Survey or MRS) was conducted by the New York State Office of Children and Family Services (OCFS) with technical assistance provided by the New York State Technology Enterprise Corporation (NYSTEC). The survey was administered as an online survey using SurveyMonkey with data collection occurring from September 18, 2023, to November 13, 2023.

Federal statute (42 USC 9858c(c)(4)(A)) and federal regulation (45 CFR 98.45(a)) require that the state establish payment rates for child care assistance that are sufficient to ensure equal access to child care services for eligible children that are comparable to those provided to families that are not eligible to receive child care assistance. Further, federal regulation 45 CFR 98.45(b)(2) requires that the state summarize how payment rates are adequate based on the most recent market rate survey or an alternative methodology conducted no earlier than two years prior to the submission date of the current New York State Child Care and Development Fund (CCDF) Plan. Additionally, section 410-x(4) of New York State Social Services Law requires that payment rates must take into account the variations in the costs of providing child care in different settings to children in different age groups, and any additional costs of providing child care for children with special needs.

Market rate surveys offer an assessment of the price of care from a parent's perspective, i.e., the price charged by the provider and paid by the parent. If a state conducts a market rate survey to gather data to inform their child care assistance payment rate setting, then they must also conduct a more narrowly focused cost analysis which is referred to as a "narrow cost analysis" (NCA). The NCA examines the cost of meeting basic health, safety, quality, and staffing requirements (base level care) and higher-quality care at each level of quality. The analysis must also identify gaps between the cost of care and child care assistance payment levels adopted by the state to be considered as part of the rate setting process. States have flexibility in determining what approach to take for their NCA, including leveraging existing studies, readily available data, and publicly available cost modeling tools. In order to satisfy the NCA requirement in relation to the 2024 market rates, OCFS will present provider cost of care estimates based on the 50-State Child Care Cost Model launched by Prenatal to Five Fiscal Strategies in April 2024.

Section 410-x(4) of the Social Services Law provides that the amount of payments for child care services under the New York State Child Care Block Grant (NYSCCBG) must be the "actual cost of care" up to the applicable market-related payment rate. Title 18 of the Official Compilation of Codes, Rules, and Regulations of the State of New York (NYCRR) Section 415.1(m) defines "actual cost of care" as "the rate usually charged by the child care provider for non-subsidized child care services." Therefore, New York conducted a Market Rate Survey to assess the prices that licensed, registered, and permitted child care providers charge parents for child care throughout New York State. That price data was then used as the basis for establishing child care assistance market-related payment rates (commonly referred to as "the market rates") for child care services funded under the NYSCCBG and the Social Services Block Grant (Title XX).

MARKET RATE SURVEY DATA COLLECTION

Overview of the Survey Process

The Market Rate Survey was conducted as an online, self-administered survey open to all licensed/registered/permitted[1] child care providers across New York State. Data were collected from September 18, 2023, to November 13, 2023. The survey and all materials were available in English and Spanish. OCFS worked with the New York State Technology Enterprise Corporation (NYSTEC), both prior to survey initiation and throughout data collection, to develop the data collection tool on SurveyMonkey and many supplemental materials that were used to promote survey participation and assist providers in completing the survey.

Prior to the initiation of data collection, a "dear provider letter" (Appendix 1) was distributed by email to all licensed/registered/permitted child care providers to inform them about the upcoming survey. OCFS also reached out to key stakeholders, before and during the survey, to help contact providers about the Market Rate Survey and encourage provider participation. Materials were made available on the OCFS website to assist providers in completing the survey, and an email address fielded questions from providers about the survey. Participation in the survey was voluntary and anonymous. No incentive was offered to child care providers for their participation in the survey. Upon completion of data collection, NYSTEC sent all data to OCFS for review and analysis.

Stakeholder Input and Survey Content

OCFS created the survey questions used in the Market Rate Survey with stakeholder input solicited from the following:

- Child care providers (a pre-MRS planning survey was sent to all licensed/registered/permitted child care providers to gather their input on the upcoming survey);
- Child care stakeholders (OCFS presented results of the pre-MRS planning survey and gathered additional feedback during monthly calls for child care stakeholders);
- Education Trust NY (which received private funding to develop a cost of care model for New York State) and P-5 Fiscal Strategies (OCFS met with these policy/advocacy organizations to gather input on draft survey questions);
- NYSTEC;
- Civil Service Employees Association (CSEA), Local 1000, AFSCME, AFL-CIO, the union that represents home-based child care providers outside of New York City;
- United Federation of Teachers (UFT), the union that represents home-based child care providers in New York City;
- New York Early Care and Learning Council (ECLC) and the Child Care Resource and Referral (CCRR) agencies represented by the ECLC, and

[1] The MRS included providers who are 1) part of the priced child care market available to the public and 2) for whom the entire universe of programs could be determined at the start of data collection, so that all providers could have the opportunity to participate in the survey. The MRS included child care providers licensed and registered by OCFS as well as group day care programs in New York City that are permitted by NYC DOHMH. See "Provider Types" below for a more detailed description of the types of providers included in the survey.

- New York State Early Childhood Advisory Council (ECAC).

The content of the Market Rate Survey has remained relatively stable over the past six surveys, particularly the questions pertaining to the rates charged, which form the bulk of the survey, and the ancillary questions about children in care and experiences with child care assistance (previously referred to as "subsidy). The survey asked providers to report on their full-time and part-time rates for four age groups of children. For school-age children, the survey also asked providers for their rates when school is not in session, such as holidays and school vacations. A new section was added to the survey to collect cost-related information primarily on salaries/wages and building-related costs (rent or mortgage and utilities).

Provider Notifications

All provider notifications and supplemental materials about the MRS were provided in both English and Spanish. Prior to the start of the MRS, OCFS emailed a notification about the survey to all licensed and registered child care providers in the state as well as permitted group day care programs located in New York City. The email included an attached "dear provider letter" inviting all providers to take the survey (Appendix 1). OCFS also sent email reminders to all potential survey participants every 1-2 weeks throughout the data collection campaign.

Survey Universe

The primary purpose of the Market Rate Survey was to collect child care price data that would be used to establish child care assistance market-related payment rates for child care services funded under the New York State Child Care Block Grant (NYSCCBG) and Social Services Block Grant (Title XX). Those payment rates must be sufficient to ensure that child care assistance recipients from across the state are able to access care from the full range of provider types in their communities. From 2001 to 2022, New York collected child care price data using telephone surveys with a stratified random sample of providers, with a statistically valid sample size (95% confidence level and 5% margin of error) calculated for each of 20 combinations of provider type and county cluster group (i.e., strata). In the 2021-22 MRS, OCFS supplemented the telephone surveys with online surveys to boost response rates. In the 2023 MRS, OCFS shifted from a telephone survey to an exclusively online survey approach, due to declining response rates for telephone surveys in general and stakeholder feedback indicating the desire for self-administered online survey approach. One of the advantages of this new approach was that all providers could be invited to participate.

Provider Types

The MRS included licensed, registered, and permitted child care providers in New York State, both center-based programs and home-based providers. The specific provider types are:

- Center-based providers
    - Day Care Centers (DCC). The survey universe included all DCCs in New York State, both of those located
        - outside of New York City, which are licensed by OCFS, and
        - in New York City, which are permitted by the New York City Department of Health and Mental Hygiene (NYC DOHMH) and referred to as Group

Day Care or Group Child Care in New York City. Note, while these programs are permitted by NYC DOHMH rather than licensed by OCFS, they are collectively grouped with other Day Care Centers in this report and in the child care assistance payment rate structure.
    - School-Age Child Care programs (SACC)
    - Small Day Care Centers (SDCC). The survey universe did not include SDCCs because there were none currently open at the start of the survey when the provider list was compiled.
- Home-based providers
    - Family Day Care homes (FDC)
    - Group Family Day Care homes (GFDC)

In addition to these child care providers, New York State also recognizes three types of legally exempt child care, meaning that the providers are not required to be licensed, registered, or permitted by New York State or New York City. The three legally exempt provider types are in-home (meaning in the child's own home), family child care (in a home that is not the child's), and group (programs located in a facility, other than a residence). Legally exempt child care providers are required to become enrolled with OCFS if they want to provide care to and receive payment for children receiving child care assistance under the NYSCCBG. There are an unknown number of additional legally exempt child care providers who could not be identified by OCFS because they do not care for any children receiving child care assistance. As such, legally exempt providers could not be included in a representative and valid survey because only a subset of the entire universe of legally exempt providers were known to OCFS and reachable. Therefore, the universe of child care providers for the MRS was composed of licensed/registered/permitted child care providers only.

County Cluster Groups

There are 58 local social services districts (referred to as "districts" in this report) in New York State that administer the child care assistance program within each district. Each district consists of a single county, except for the district of New York City, which comprises five boroughs, each of which is a county. The number of licensed/registered/permitted child care providers varies considerably across New York State (Table 1). Many districts have too few licensed/registered/permitted child care providers to reliably conduct a survey and establish market-related payment rates that are sufficiently stable and representative of the population of child care providers in that provider type and county. Therefore, districts are clustered in order to attain sufficient survey responses for each provider type (DCC, SACC, FDC, and GFDC) and age group upon which the child care assistance payment rates are based upon. These are called county clusters.

The composition of the county clusters was first established over 20 years ago based on cost of care data from a mail-in child care provider rate survey. At that time, the counties were grouped into 5 clusters, and the composition of those clusters has changed occasionally over time. During analysis of the price data reported in the 2023 MRS, the former county clusters 2 and 4 were combined into a single new county cluster 2 due to similarity of the prices reported and declining

numbers of providers in the former county cluster 4, which only included five counties. The former county cluster 5 was redesignated as county cluster 4. The county clusters for the 2024 market rates were as follows:

- **Cluster 1**: Nassau, Putnam, Rockland, Suffolk, Westchester
- **Cluster 2** (*combines the former county clusters 2 and 4, former county cluster 4 counties are underlined*): Albany, Columbia, Dutchess, Erie, Monroe, Onondaga, Ontario, Orange, Rensselaer, Saratoga, Schenectady, Tompkins, Ulster, Warren
- **Cluster 3**: Allegany, Broome, Cattaraugus, Cayuga, Chautauqua, Chemung, Chenango, Clinton, Cortland, Delaware, Essex, Franklin, Fulton, Genesee, Greene, Hamilton, Herkimer, Jefferson, Lewis, Livingston, Madison, Montgomery, Niagara, Oneida, Orleans, Oswego, Otsego, Schoharie, Schuyler, Seneca, St. Lawrence, Steuben, Sullivan, Tioga, Washington, Wayne, Wyoming, Yates
- **Cluster 4** (*previously referred to as county cluster 5*): Bronx, Kings (borough of Brooklyn), New York, Queens, Richmond (borough of Staten Island)

Additional Survey Questions

The MRS included a few questions about child care assistance and price changes, including 1) whether the provider's prices had changed in the past year and why, 2) whether there are barriers to caring for children receiving child care assistance, 3) whether the provider has children receiving child care assistance payments enrolled in their program, 4) how their private pay rates changed compared to the 2022 market rates, 5) salary information for program staff, and 6) building costs (rent or mortgage, and utilities).

Quality Assurance Follow-Up Telephone Calls

After the completion of the MRS, OCFS conducted follow-up phone calls with survey respondents reporting especially low and high prices to verify the accuracy of prices that were reported on the survey.

MARKET RATE SURVEY DATA ANALYSIS

Upon completion of data collection, NYSTEC sent all survey data to OCFS for review and analysis.

Data Checking and Cleaning

- **"Completed" surveys**

  A survey record was counted as "completed" as long as a provider reported one or more child care prices. If any of the additional survey questions were not completed, the provider's record was maintained in the survey database. Therefore, some of the additional question results may have smaller sample sizes than the total number of survey participants (n=5,927 survey responses, of which n=247 responses were excluded as outliers).

- **Reasonable numerical ranges**

  OCFS checked the data by flagging values outside of reasonable numerical ranges for hourly, daily, weekly, and monthly prices reported for all age groups.

- **Internal consistency checks**

  OCFS flagged inconsistencies in prices for individual providers for further data checking. For a given provider, part-time weekly and monthly prices should be no more than corresponding full-time weekly and monthly prices. For a given provider, the prices for older children are expected to be no more than the prices for younger children. For a given provider the prices per time period are expected to be higher for more time, i.e., monthly rates are expected to be greater than weekly, which are expected to be greater than daily, which are expected to be greater than hourly. These are general guidelines for flagging surveys for further checking and confirmation.

- **Treatment of flagged values**

  Each flagged value was compared to an individual provider's other rates as well as to the rates of other providers of the same provider type and county cluster in order to identify correctable errors. An example of a correctable data entry error was a provider who reported a price of $350 *per month* for infants, which was flagged for follow up because it was unusually low. Upon examination, the provider also reported the same weekly price for infants, $350 *per week*. Both of these cannot be true. Compared to the prices reported by other similarly situated providers (home-based providers in county group 2), and in comparison, to the daily price reported by the same provider for infant care, $100 per day, only the value $350 *per week* was retained for analysis.

  If an obvious correction could not be determined for a flagged value based on the provider's other prices, OCFS attempted to reach the provider by telephone to confirm or correct the reported prices. If these providers could not be reached, then the recorded values were kept in the dataset unchanged unless the prices fell well beyond the reasonable numerical range, i.e., extreme outliers. In such cases, other information about the program typically indicated that the data should be excluded from analysis because

the program was not part of the intended universe for the survey (i.e., the priced child care market utilized by private pay working families).

Data Conversions

The MRS allowed providers to report price data on a per-hour, -day, -week, or -month basis. However, the 2024 New York State child care market rates are established for the following rate types: weekly, daily, and part-day. Whenever possible, the price data that was reported by providers was used as reported without conversion. When a provider's price structure could not be directly mapped to a New York State child care market rate, then the original price data were converted as follows.

- **Weekly market rates**
  - For infant, toddler, and preschool-age children:
    - Full-time per-week prices were used as the weekly rate without conversion whenever reported.
    - If there was no full-time per-week price reported for a particular age group, then the next available converted price was used.
      - Per-month prices were divided by 4.33.
      - Per-day prices were multiplied by 5.
  - For school-age children:
    - School vacation per-week prices were used as the weekly rate without conversion whenever reported.
    - If there was no school vacation per-week price reported, then the next available school vacation converted price was used.
      - Per-month prices were divided by 4.33.
      - Per-day prices were multiplied by 5.
- **Daily market rates**
  - For infant, toddler, and preschool-age children:
    - Full-day prices were used as the daily rate without conversion whenever reported.
    - If there was no full-day price reported for a particular age group, then the maximum full-time converted price was used.
      - Per-week full-time prices were divided by 5.
      - Per-month full-time prices were divided by 21.65.
  - For school-age children:
    - School vacation full-day prices had no conversion.
    - If there was no vacation full-day price reported, then the maximum school vacation converted price was used.
      - Per-week vacation prices were divided by 5.
      - Per-month full-time prices were divided by 21.65.
- **Part-day market rates**
  - Calculated as two-thirds of the daily market rates. The MRS did not include questions on the cost of part-day care, but the New York State market rates include a part-day category that covers half the amount of time as the daily payment rates

(3-6 hours compared to 6-12 hours). To calculate a part-day payment rate, two-thirds (instead of one half) of the daily rate was chosen to reflect economies of scale, i.e., higher per-hour cost for a lower number of hours in care.

Legally Exempt Child Care Provider Market Rates

Since the total universe of legally exempt child care providers is not known to OCFS and a representative sample could not be selected for inclusion in the MRS, OCFS used an alternative methodology to derive child care market rates for legally exempt child care providers. It is common for states to set payment rates for legally exempt child care providers at a percentage of the payment rates for corresponding types of licensed, registered, or permitted child care (see 45 CFR Part 98, CCDF final rule, published in the *Federal Register*, Vol 81, No. 190, 9/30/2016, p. 67509).

- **Legally exempt family and in-home child care providers**
  - New York State legally exempt family and in-home child care provider standard market rates were calculated as 65% of the corresponding registered family day care market rates for each county group, age group, and rate type.
  - New York State legally exempt family and in-home child care provider enhanced market rates were calculated as 70% of the corresponding registered family day care market rates for each county group, age group, and rate type. The enhanced market rate is available to legally exempt family and in-home child care providers who have demonstrated to the enrollment agency that they have completed 10 or more hours of training annually in the areas set forth in section 390-a(3)(b) of the Social Services Law.
  - Districts have the option to increase the enhanced market rate for eligible legally exempt family and in-home child care providers up to a maximum of 75% of the corresponding registered family day care market rates for each county group, age group, and rate type.
- **Legally exempt group child care programs**
  - New York State legally exempt group child care program standard market rates were calculated as 75% of the corresponding licensed/permitted day care center rates for each county group, age group, and rate type.
  - Districts have the option to establish up to two enhanced market rates for eligible legally exempt group child care programs, each of which may be set at any whole number percentage greater than 75% and up to a maximum of an additional 6% of the corresponding licensed/permitted day care center rates for each county group, age group, and rate type.
  - The enhanced market rates, referred to as Enhanced Market Rate-Health and Enhanced Market Rate-Training (see OCFS policy directive 18-OCFS-ADM-10), are only available if the paying district has elected to establish such a rate as indicated in their Child and Family Services Plan, and the legally exempt group child care program has demonstrated to the enrollment agency that they meet the additional requirements.

2024 New York State Child Care Assistance Market Rates

The 2024 child care assistance payment rates (market rates) were established at no less than the 80th percentile of the prices reported by providers on the 2023 Market Rate Survey for licensed, registered, and permitted child care. The market rates were set above the 80th percentile in some instances to provide each rate with a minimum 5% increase from the 2022 market rates to allow providers to meet the health, safety, quality, and staffing requirements for high quality child care. As described in detail above, the market rates for enrolled legally exempt child care providers were established at a percentage of the corresponding market rates for licensed, registered, and permitted child care. Market rates were established for each county cluster, provider type, age group, and rate type.

- **County Clusters:** 1 (Long Island and metro north), 2 (upstate-urban), 3 (upstate-rural), 4 (New York City)
- **Provider Types:** Day Care Centers (DCC), School-Age Child Care (SACC), Family Day Care (FDC) and Group Family Day Care (GFDC) combined, Legally Exempt Group Care (LEGC), and Legally Exempt Family Child Care (LEFC) and Legally Exempt In-Home Child Care (LEIH) combined
- **Age Groups:** Infant (defined as less than 18 months for center-based, less than 2 years for home-based), Toddler (defined as 18 months through 2 years for center-based, 2-years-old for home-based), Preschool (defined as 3 through 5 years), School-Age (defined as 6 through 12 years)
- **Rate Types:** Weekly, Daily, Part-Day

Prior to the 2015 MRS, FDC and GFDC providers' data were analyzed separately and resulted in different sets of child care market rates for the two provider types. FDC and GFDC providers' data were combined for the analysis of the MRS data beginning in 2015 and continuing with the 2017-18, 2021-22, and 2023 surveys. A single set of market rates applies to both provider types. These two provider types were combined because the health and safety regulations, including staff/child ratios, governing the two provider types have become much the same over the years, with the primary regulatory distinction between the two modalities being the total capacity.

A percentile is a statistical measure that indicates the value below which a given percentage of observations fall. For example, the 80th percentile rate was the rate below which 80% of all rates could be found. Or, in other words, eight out of 10 providers charged a rate that was at or below the 80th percentile rate. And conversely, two out of 10 providers charged a rate that was at or above the 80th percentile rate. Percentiles are particularly useful here because outliers and skewed data distributions have a much smaller impact on a percentile than they would on measures of central tendency, such as an average. Furthermore, the 80th percentile exceeds the federal benchmark 75th percentile that is used to ensure equal access for families in receipt of child care assistance.

MARKET RATE SURVEY RESULTS

Response Rates

Out of a total of 17,406 licensed, registered, and permitted child care providers as of September 2023, n=5,927 "completed" (at least one price was recorded) market rate surveys were collected for an overall response rate of 34% (Table 3). The response rate varied by county group and provider type. Downstate counties (county groups 1 and 4) had lower response rates than the rest of the state, and SACC programs consistently had the lowest response rates. Historically, MRS response rates have been lowest for SACC programs due to a combination of factors, including the survey invitation not reaching the appropriate staff, complex rate structures that make it challenging to respond to the survey, and programs not having private pay prices or charging only nominal fees, such that they self-exclude.

Child Care Assistance Market Rates

- ### 80th Percentile

  The 2024 child care assistance market rates (Table 4) were established at no less than the 80th percentile of the prices reported in the 2023 MRS for each county cluster, provider type, age group, and rate type. The 2024 market rates were set above the 80th percentile of prices in some instances to provide a minimum 5% increase from the 2022 market rates. This impacted certain rates in county groups 2 and 3.

  The 80th percentile rates that did not show a minimum 5% increase from the 2022 rates were almost entirely in county group 3 with the most rural counties in New York, as well as infant and toddler FDC/GFDC rates in county group 2 (which combines the previous county groups 2 and 4). The 2024 child care market rates were set at a minimum 5% increase for licensed, registered, and permitted programs, to raise them up to the lowest percentage increases seen across other county groups as compared to the 2022 market rates, which ranged from 5% to 35%. The minimum 5% increase was applied to ensure equal access for families receiving child care assistance, especially in rural regions where child care prices are resistant to change due to the inability of private pay families to afford higher prices, and to allow providers to better meet health, safety, quality, and staffing requirements for high-quality care.

- ### Special Needs Market Rates

  Prior to 2022, the market rate limits for a child with special needs were set at the highest child care market rates in the state, irrespective of age, county group, or provider type for each type of rate. The resulting increase in the market rate for qualifying children with special needs (compared to the market rates that otherwise would have applied to a child) varied significantly across the state. Beginning with the release of 22-OCFS-LCM-14, OCFS set the special needs market rate at 115% of the applicable market rate, or 15% above the market rate that would otherwise apply based on the child's age, type of care, county group, and rate type.

Rates at Other Percentiles

Although the 2024 market rates (Table 4) were established at no less than the 80th percentile of the prices reported on the 2023 Market Rate Survey, data are also presented here at other meaningful percentiles:

- **50th percentile**, or median, is a measure of central tendency (Table 5)
- **60th percentile** is required to be reported in the state's CCDF Plan (Table 6)
- **75th percentile** has long been the benchmark level recommended by the Administration for Children and Families as ensuring equal access for families in receipt of child care assistance compared to private pay families (Table 7)

Provider Rate Changes

Providers were asked whether their rates had changed in the past year, and if so, what the reasons for the changes were. Just over half of providers (54%) indicated that their rates had increased in the past year, and 4% of providers reported decreased rates. The percentage of providers reporting rate increases was 11 percentage points higher than in the 2021-22 MRS.

Several factors may have influenced providers to raise their prices between the 2021-22 and 2023 MRS, including but not limited to,

- New York's minimum wage increase effective January 1, 2023,
- the Consumer Price Index rose by 6% between March 2022 and September 2023, and
- the child care assistance market rates increased effective June 1, 2022.

The most reported reason that providers cited for *raising* their rates was salary/wages followed closely by COVID-19. Over half of providers who reported rate increases attributed the increases to salary, food and supply costs, quality improvements, utility costs, and/or building costs (Table 9). Over one-third of providers with rate increases indicated that training, insurance, and new staff were reasons for price increases.

Very few providers reported that they had reduced their rates (4%). The most common reason given by providers who reported rate decreases was COVID-19.

Barriers to Caring for Children Receiving Child Care Assistance

Dramatic improvements were observed in the number of providers who reported there were barriers to caring for children with child care assistance payments. Most providers (75%) reported that there were no barriers to caring for children receiving child care assistance, a reversal of the pattern seen in the 2017-18 and 2021-22 MRS. Only one quarter of providers who participated in the survey reported that there was one or more barriers to caring for children in receipt of child care assistance (1,315 / 5,342 = 24.6%, see Table 10).

Improvements were seen for every potential barrier, comparing the percentage of providers citing a barrier in 2023 compared to 2021-22. On the 2023 MRS, the most commonly cited barriers were that it takes too long to get paid (14.5%) and that the payment rates are too low (14.3%), compared to 27% and 40% of providers, respectively in the 2021-22 MRS. Overall, about one in five providers cited one or more payment issues (21.3%) in 2023 compared to more than half of respondents on the 2021-22 MRS.

Provider Participation in Child Care Assistance

The significant improvement in the percentage of providers citing barriers to caring for children receiving child care assistance cannot be explained by a reduction in the percentage of providers caring for children receiving child care assistance. Roughly 80% of survey respondents reported that some or all their children in care were paid through child care assistance, compared to only 68% in 2021-22 (see Table 11). This is higher than but not inconsistent with other data sources. According to the FFY2022-23 ACF-800 annual report, 12,282 licensed, registered, and permitted child care providers cared for one or more children receiving child care assistance during the year, in a year with roughly 17,000 licensed, registered, and permitted providers in New York (70%). Typically, the percentage on the MRS is higher than the percentage of providers on the ACF-800 report, possibly reflecting a greater willingness to participate in the MRS by providers caring for children receiving child care assistance than for those exclusively caring for private pay children.

Of those survey respondents who reported caring for children receiving child care assistance, the majority (75.1%) also reported having a contract with a local social services district. The validity of this percentage is unconfirmed because there can be confusion among providers as to what constitutes a "contract" with a district. Some survey participants may have responded in the affirmative to this question based on the completion and/or exchange of paperwork with the district that is necessary to process and receive child care assistance payments, rather than having an actual contract with the district.

Of providers who report caring for children receiving child assistance and charging higher rates than the district pays, almost one-third also reported charging families the difference between their rates and the district payment rate. In New York State, when a provider enters into a contract with a district, the contracted child care assistance payment rate is considered the "actual cost of care," even if the contracted provider has a higher private pay rate. By entering into such a contract, the provider agrees to accept the contracted rate, which may be lower than the "market rates," and to not charge the family the difference between the district payment and the private pay rate. Providers may enter into contracts with lower payment rates because of other advantages. Among providers with children receiving child care assistance in care who reported that they did not have a contract with a district, one would expect that they would charge the family the difference between the district payment and their private pay rates. However, only 29% reported that they charge families the difference. Data for these two questions ('whether providers contract with a district' and 'charging families the amount in excess of the district rates') are surprising and suggest that providers absorb costs in excess of current market rates because they know that parents cannot afford to pay them.

NARROW COST ANALYSIS

CCDF recipients are required to assess the cost of providing child care and to assess the gap (if any) between providers' cost of care and child care assistance payment rates. If lead agencies conduct an MRS, they may conduct a narrow cost analysis (NCA) rather than a full cost analysis. OCFS considered two publicly available, cost modeling options for its NCA:

- Provider Cost of Quality Calculator (PCQC) using public data sources and some data collected on the MRS
- Prenatal to Five Fiscal Strategies' (P5) 50-State Child Care Cost Model

Both model options include default values that can be overridden to customize estimates, and results were comparable across models. Cost of care estimates presented here are based on the P5 Child Care Cost Model, which has the advantages of ease of use, greater transparency, and consistency across states. In most instances, the default values, or higher, were entered into the model. See Table 12 in the Appendix for detailed information about model inputs. Center-based scenarios were run using the default ratios and maximum group sizes in the model, which were based on New York's regulatory requirements. The number of classrooms was based on average classroom data for licensed day care centers. Analyses were run twice at lower (Bureau of Labor Statistics, BLS) and higher (MIT Living Wage) salary levels as a proxy for a baseline level of care (current salary level are assumed to cover health and safety requirements) and higher quality care, respectively.

The resulting cost of care estimates produced by the P5 Child Care Cost Model are for the whole state of New York (shown in Table 13). To facilitate comparison to New York's child care assistance market rates, statewide cost estimates were pro-rated for each market rate county cluster by applying a conversion factor that was derived from the MIT Living Wage salaries for each county. For families with one adult or two adults both working and with zero, one, or two children, the living wage for each county was compared to the statewide living wage for New York. The average of those percentages was taken for all counties in each county group. The resulting county group conversion percentages were 113%, 88%, 78%, and 108% for county groups 1 to 4, respectively. Note—county group conversion factors were also calculated using the market rates yielding similar percentages, and confirming the validity of this approach (112%, 88%, 75%, and 107%, respectively).

New York's child care market rate age groups do not precisely align with the age groups used in the P5 Child Care Cost Model. The closest comparable age categories are used here (see Figure 1 for a comparison of the age group definitions for the market rates and the P5 Child Care Cost Model).

Figure 1. Comparison of age categories by type of child care in the Child Care Cost Model and New York's child care assistance market rates.

Type of Care	P5 Child Care Cost Model	New York Market Rates
Center-based care	Infant (0 to 12 months)	Under 1 ½ years
	Toddler (12-24 months)	1 ½ through 2 years
	Threes	3 – 5 years
	Fours	
	School Age (5 – 12 years)	6 – 12 years
Home-Based Care	Infant-Toddler-Preschool	Under 2 years
		2 years
		3 – 5 years
	School Age (5 – 12 years)	6 – 12 years

For school-age children, the P5 Child Care Cost Model produces *annual* cost of care estimates which are divided by 52 weeks for a flat weekly average. However, school age children are typically in part-time care during the school year (slightly less expensive per week) and full-time care when school is out (slightly more expensive per week). New York's weekly market rate applies to full time care. Rather than using the annual cost estimates divided by 52 for school-age comparisons to New York's child care assistance weekly market rates, the cost of care estimates were converted to a full-time weekly cost estimate by multiplying the annual figure by 2.5%, resulting in slightly higher weekly costs than a flat weekly average (i.e., dividing by 52, or multiplying by 1.92%). For example, in the P5 Child Care Cost Model for center-based care with BLS salaries, the resulting New York statewide cost estimate was $9,375 per year or $180 per week, which averaged part-time care when school is in session and full-time care when school is out. The annual estimate was multiplying by 2.5% instead, for a weekly full-time estimate of $234 (instead of $180). The school-age full-time weekly cost estimates were pro-rated as described above, and then regionally adjusted for the four market rate county groups, as was done for the other age groups.

NCA Results

Tables 14 (center-based care), 15 (family day care homes), and 16 (group family day care homes) show the estimated weekly full-time cost of care estimates by age group, county cluster, and quality level with comparisons to the 2024 market rates. Comparison data are also displayed in figures 2 through 9, which are organized by the 2024 market rate groups (abbreviated as MR 2024 in tables and figures), with one figure for center-based care and one figure for home-based care. The two quality levels of the cost of care estimates are abbreviated as NCA1 (P5 Child Care Cost Model with BLS salaries) and NCA2 (P5 Child Care Cost Model with MIT Living Wage salaries). Both cost of care estimates and the market rates are highest for the youngest children and decrease with each age group.

In center-based care, the gap between the estimated cost and the market rates is greatest for infants and progressively smaller for each age group, such that the market rates are nearly the same as, ***or greater than***, the estimated cost of providing care for preschoolers, and the market rates are ***greater than*** cost of providing care for school age children. The small group sizes and higher staff to child ratios for the youngest children make it more costly to provide care for younger children. The gap between provider costs and prices is largest for the youngest children because providers prices (reflected in the market rates) incorporate both the provider's costs and the ability/willingness of parents to pay for child care. Providers typically offset cost to price deficits for younger children with the price of care they are able to charge for older children, for which they typically have more slots.

In home-based care, the Child Care Cost Model includes two home-based programs sizes, small and large, which roughly correspond to registered family day care (FDC) and licensed group family day care (GFDC) in New York. FDCs are typically one provider with a maximum capacity of six children of all ages, and up to two additional school-age children. GFDCs are typically one provider with one assistant and double the FDC capacity maximums. Both FDCs and GFDCs must have one caregiver for every two children under the age of 2 years. It should also be noted that the P5 Child Care Cost Model produces cost estimates for only two age categories, a combined infant-toddler-preschool category and school-age category, whereas there are child care assistance market rates for four age categories in home-based care. Because the cost estimates are the same for infant, toddlers, and preschoolers, but the market rates are highest for the youngest children, the gap between child care assistance market rates and cost (if there is a gap) is larger in toddlers and preschoolers than in infants. For GFDC providers, the 2024 market rates exceed all cost estimates for all age groups in all regions. For FDC providers, the market rates exceed cost estimates for infants and school-age children in all regions and at both baseline and higher quality (except for infants, county group 1, MR is 97% of cost estimate). The toddler and preschool market rates for FDC providers range from 81-102% of cost estimates.

Comparisons of the estimated cost of care (at baseline, NCA1, and higher quality, NCA2) to the 2024 market rates are shown below by each county group, first for center-based care, followed by home-based care (small and large). In the figures showing home-based care, there is a single bar for the market rates and two bars for the cost of care estimates for small (FDC) and large (GFDC) programs.

County Group 1: Includes counties immediately outside of New York City: Nassau, Putnam, Rockland, Suffolk, and Westchester.

Figure 2: County Group 1: Weekly FT costs vs. CCAP MR, Centers

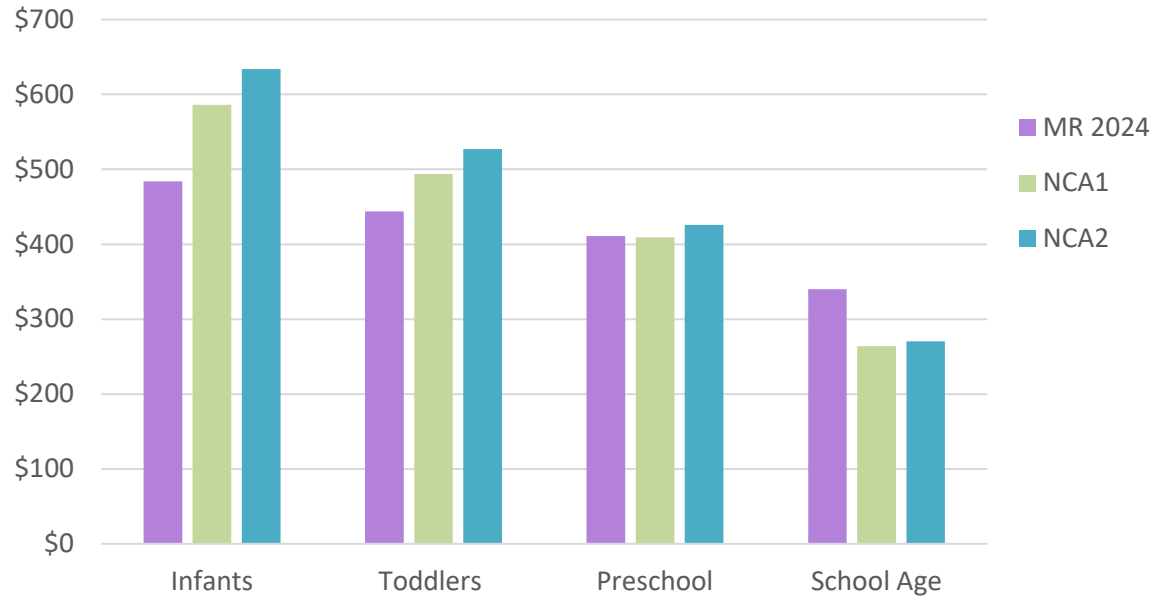

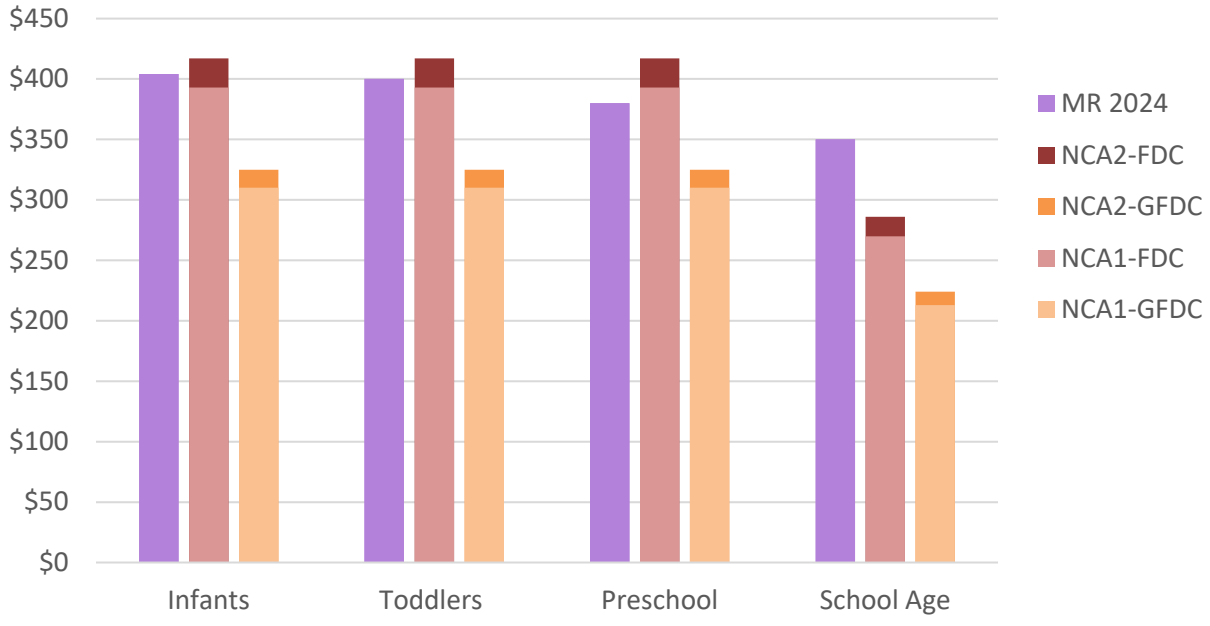

Figure 3: County Group 1: Weekly FT Costs vs. CCAP MR2024, FDC & GFDC

County Group 2: Includes urban/suburban counties outside of New York City metro area (prior to 2024, these were two separate county groups for child care assistance market rates): Albany, Columbia, Dutchess, Erie, Monroe, Onondaga, Ontario, Orange, Rensselaer, Saratoga, Schenectady, Tompkins, Ulster, and Warren.

Figure 4: County Group 2: Weekly FT costs vs. CCAP MR, Centers

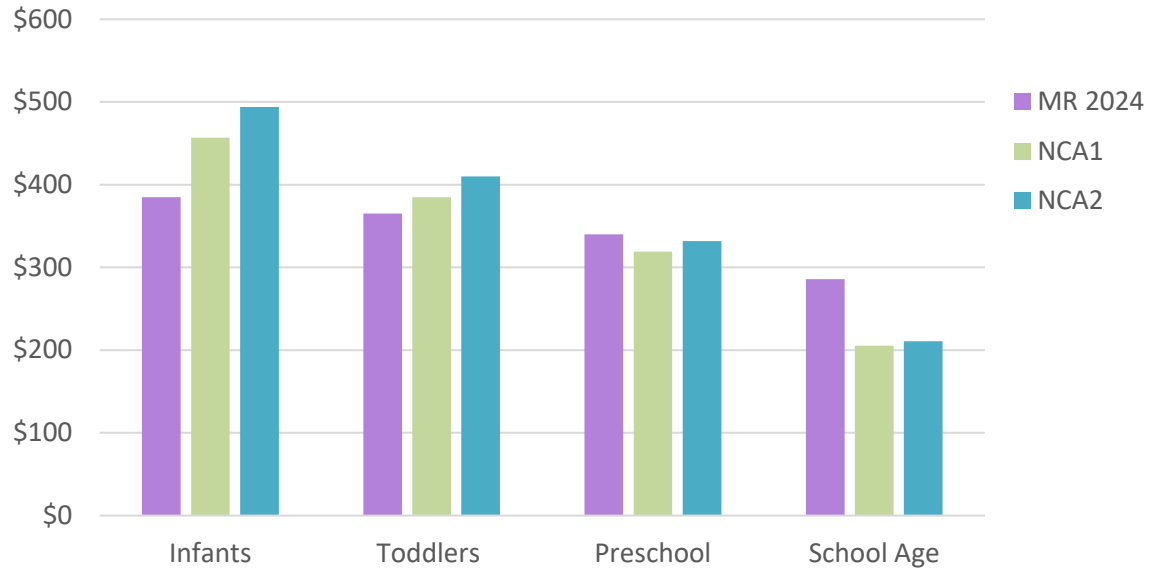

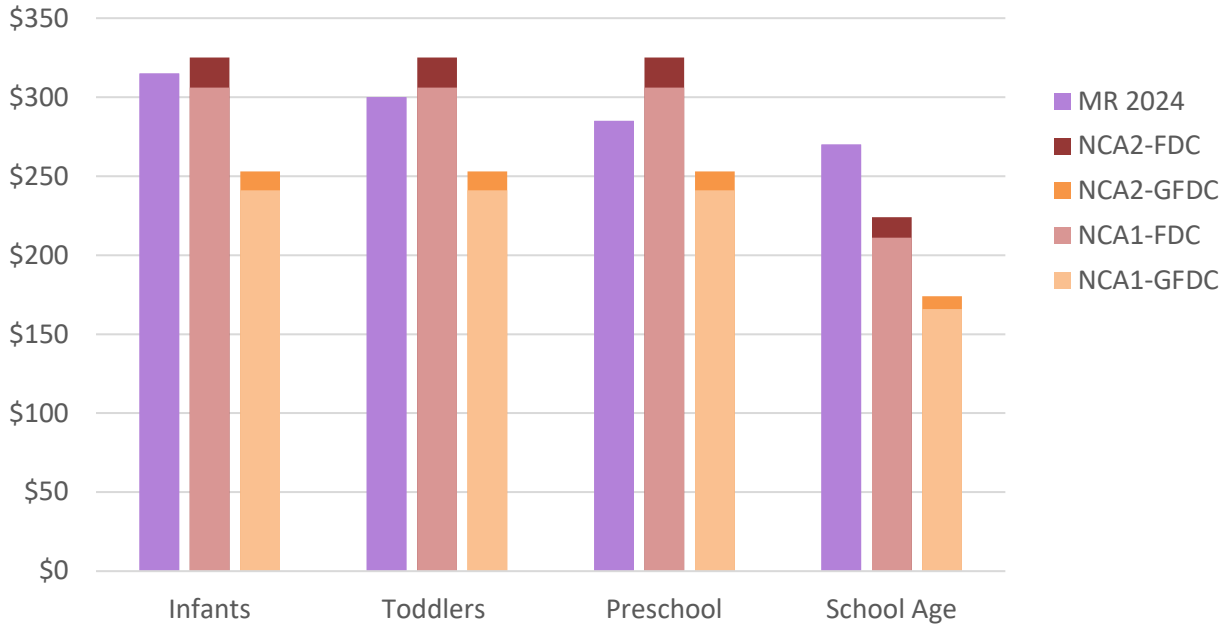

Figure 5: County Group 2: Weekly FT Costs vs. CCAP MR2024, FDC & GFDC

County Group 3: Includes the more rural counties outside of New York City metro area: Allegany, Broome, Cattaraugus, Cayuga, Chautauqua, Chemung, Chenango, Clinton, Cortland, Delaware, Essex, Franklin, Fulton, Genesee, Greene, Hamilton, Herkimer, Jefferson, Lewis, Livingston, Madison, Montgomery, Niagara, Oneida, Orleans, Oswego, Otsego, Schoharie, Schuyler, Seneca, St. Lawrence, Steuben, Sullivan, Tioga, Washington, Wayne, Wyoming, Yates.

Figure 6: County Group 3: Weekly FT costs vs. CCAP MR, Centers

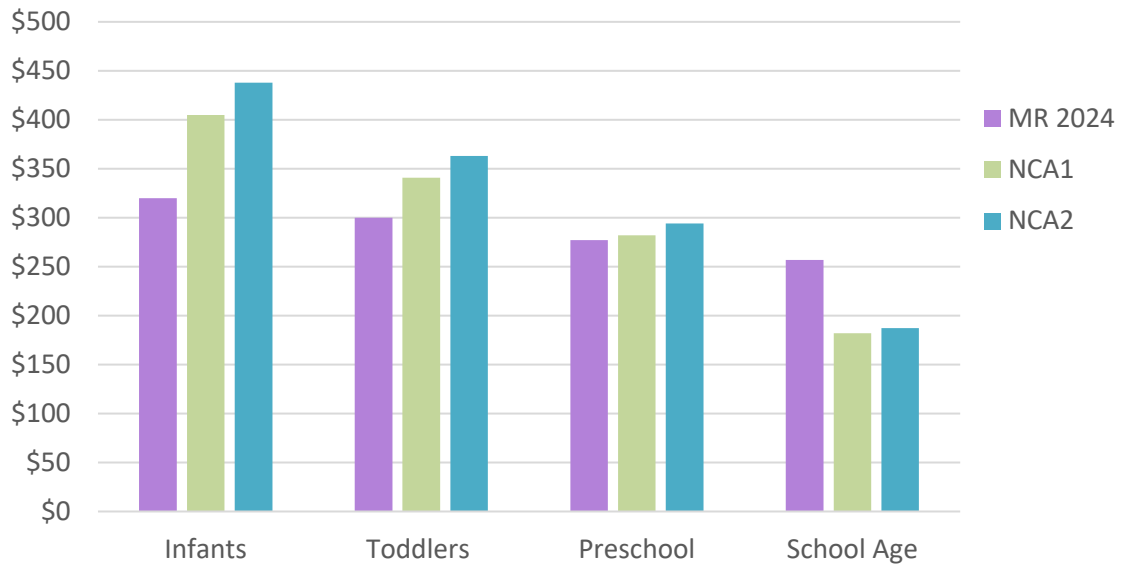

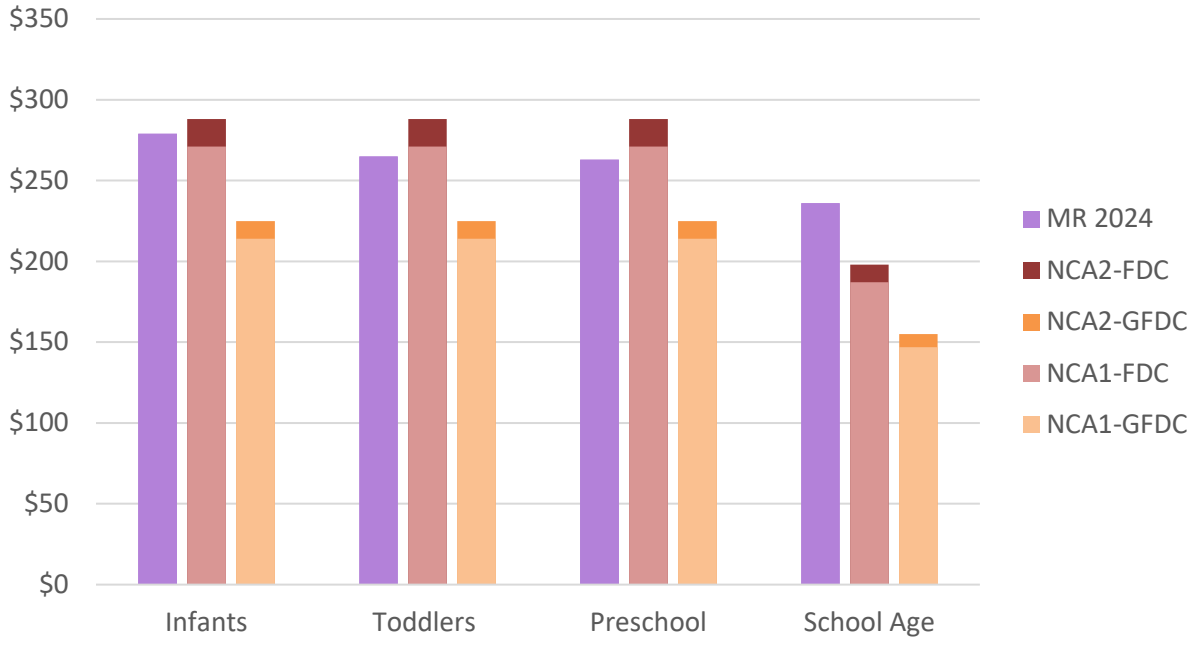

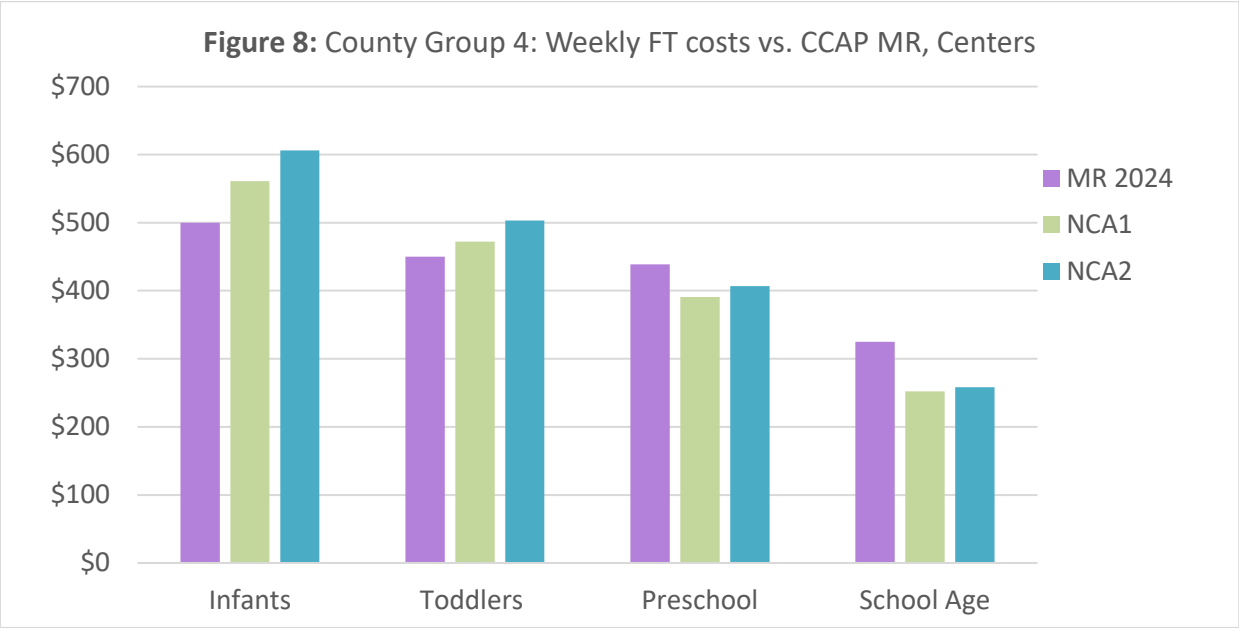

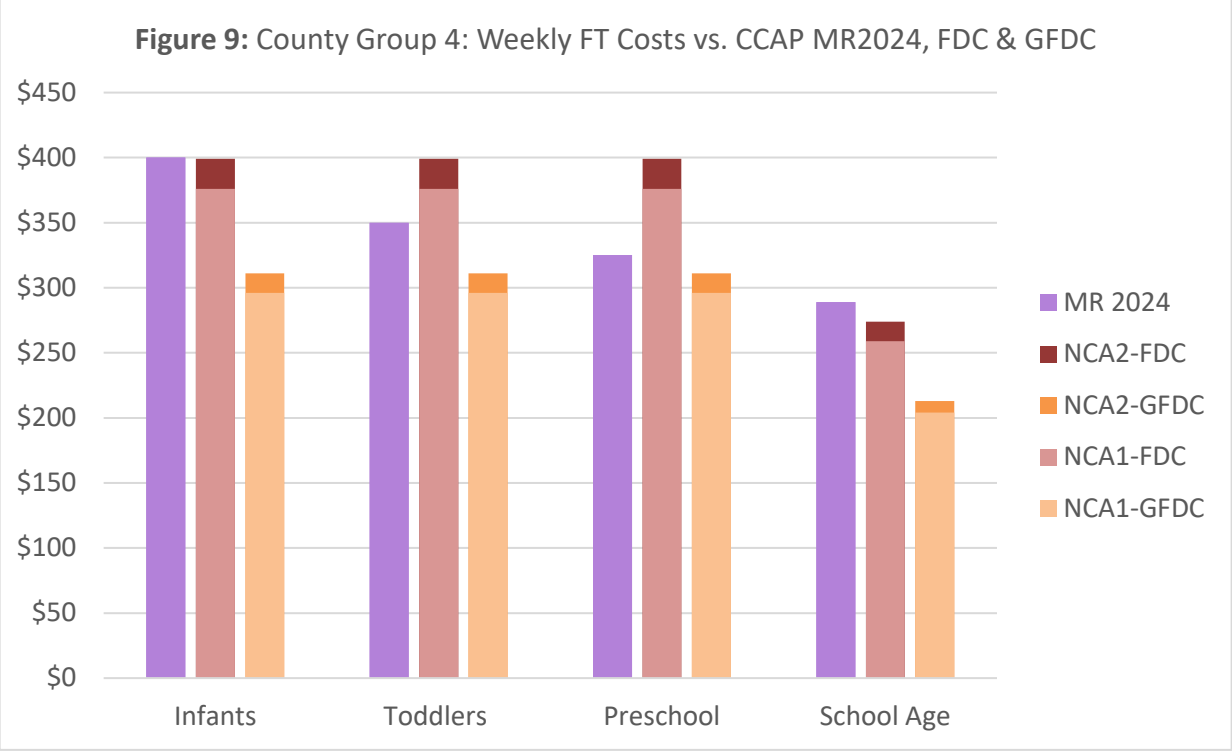

Figure 7: County Group 3: Weekly FT Costs vs. CCAP MR2024, FDC & GFDC

County Group 4: Includes the five counties of New York City: Bronx, Kings, Manhattan, Queens, and Richmond.

RESOURCES

OCFS issues external policy statements on a regular basis on the topic of the child care market rates, which are available on the agency's website at http://ocfs.ny.gov/main/policies/external/. These policies include payment rates for child care assistance, as well as policies pertaining to calculating payments for child care assistance.

Table 2. Number of child care providers with "completed" (at least one price was reported) surveys by county cluster group and provider type.

Table 3. Response rates (child care providers with "completed" surveys divided by providers with survey attempts) by county cluster group and provider type. Table 2 divided by the corresponding subtotals from Table 1.

Table 4. The 2024 New York State child care assistance market rates per county cluster group, provider type, age group, and rate type, effective October 1, 2024. Based on no less than the 80th percentile of prices reported on the 2023 New York State Child Care Market Rate Survey*.

Table 4 - 1. Percentiles of MRS at which 2024 of market rates are established.

Table 5. The 50th percentiles (i.e., median) of prices reported on the 2023 MRS per county cluster group, provider type, age group, and rate type.

Table 6. The 60th percentiles of prices reported on the 2023 MRS per county cluster group, provider type, age group, and rate type.

Table 7. The 75th percentiles (federal recommendation to ensure equal access for families receiving child care assistance) of prices reported on the 2023 MRS per county cluster group, provider type, age group, and rate type.

Table 8. Reasons reported by child care providers for price *increases* on the 2023 MRS, with comparison to data from the 2021-22 MRS. Note—n=86 providers on the 2023 MRS reported having both increased and decreased prices.

Table 9. Reasons reported by child care providers for price *decreases* on the 2023 MRS, with comparison to data from the 2021-22 MRS. Note—n=86 providers on the 2023 MRS reported having both increased and decreased prices.

Table 10. Number and percentage of providers reporting barriers to caring for children receiving child care assistance (also referred to as "subsidy" in the survey) on the 2023 MRS, with comparisons to the 2021-22 MRS and 2017-18 MRS.

Table 11. Providers self-reported participation in child care assistance (also referred to as "subsidy" in the survey), with comparison to the 2021-22 MRS.

Table 12. Narrow cost analysis model inputs for P5 Fiscal Strategies' 50-state Child Care Cost Model.

Table 13. Statewide results of P5 Fiscal Strategies' 50-state Child Care Cost Model for New York State using inputs described in Table 12 and run at two salary levels (Bureau of Labor Statistics, BLS, and MIT Living Wage, referred to here as NCA1 and NCA2, respectively). Note, statewide

cost estimates were then converted to the child care assistance payment rate county groups to facilitate comparison (shown in Tables 14-16 and Figures 2-9).

Table 14. Estimates of weekly per child costs for center-based child care from P5 Fiscal Strategies' 50-state Child Care Cost Model using two salary levels (Bureau of Labor Statistics, BLS, and MIT Living Wage, referred to here as NCA1 and NCA2, respectively) compared to the market rates established in 2024 (MR2024) by county cluster and age group.

Table 15. Estimates of weekly per child costs for small home-based child care (registered family day care, **FDC**, in New York) from P5 Fiscal Strategies' 50-state Child Care Cost Model using two salary levels (Bureau of Labor Statistics, BLS, and MIT Living Wage, referred to here as NCA1 and NCA2, respectively) compared to the child care assistance market rates established in 2024 (MR2024) by county cluster and age group. The Child Care Cost Model cost of care estimates are repeated for infant, toddler, and preschool to facilitate comparisons to the market rates, which are different for these age groups.

Table 16. Estimates of weekly per child costs for large home-based child care (licensed group family day care, **GFDC**, in New York) from P5 Fiscal Strategies' 50-state Child Care Cost Model using two salary levels (Bureau of Labor Statistics, BLS, and MIT Living Wage, referred to here as NCA1 and NCA2, respectively) compared to the child care assistance market rates established in 2024 (MR2024) by county cluster and age group. The Child Care Cost Model cost of care estimates are repeated for infant, toddler, and preschool to facilitate comparisons to the market rates, which are different for these age groups.

	LE-Enh	$263	$242	$210	$193	$53	$48	$42	$39	$35	$32	$28	$26

Abbreviations for modality: DCC=licensed day care center outside of New York City or permitted group day care program in NYC; SACC=registered school-age child care program; FDC=registered family day care home; GFDC=licensed group family day care home; LEGC=legally exempt group child care program; LE-Std=legally exempt family and in-home child care standard rate; LE-Enh=legally exempt family and in-home child care enhanced rate.

Abbreviations for age groups: I=infant (under 1 ½ years for center-based care, under 2 years for home-based care); T=toddler (1 ½ years through 2 years for center-based care, 2 years for home-based care); PS=preschooler (3 through 5 years); SA=school age (6 through 12 years).

Table 8. Reasons reported by child care providers for price *increases* on the 2023 MRS, with comparison to data from the 2021-22 MRS. Note—n=86 providers on the 2023 MRS reported having both increased and decreased prices.

	2023 MRS (n=2,982 increases, 54%, n=5,519 responses)			2021-22 MRS (n=1,937 increases, 43%, n=4,491 responses)		
Reason*	**#**	**% of Providers with Increases**	**% of Providers with Responses**	**#**	**% of Providers with Increases**	**% of Providers with Responses**
Salary / wages	2394	80.3%	43.4%	1,488	76.8%	33.1%
Supplies**	2146	72.0%	38.9%	1,256	64.8%	28.0%
Food**	2035	68.2%	36.9%	1,256	64.8%	28.0%
Utilities	2007	67.3%	36.4%	1,168	60.3%	26.0%
Building costs	1829	61.3%	33.1%	1,079	55.7%	24.0%
Quality improvement	1563	52.4%	28.3%	1,011	52.2%	22.5%
Insurance	1321	44.3%	23.9%	762	39.3%	17.0%
New staff	1176	39.4%	21.3%	673	34.7%	15.0%
COVID-19	1133	38.0%	20.5%	1,432	73.9%	31.9%
Training	1029	34.5%	18.6%	725	37.4%	16.1%
Health insurance	706	23.7%	12.8%	478	24.7%	10.6%
Fewer children**	667	22.4%	12.1%	N/A	N/A	N/A
Other	30	1.0%	0.5%	212	10.9%	4.7%

*Reasons are not mutually exclusive. Providers could select any and all reasons for their rate increase or decrease.

**Reason appeared differently on the 2021-22 and 2023 MRS. Supplies and food were a combined category on the 2021-22 MRS and are repeated in the table. “Fewer children” was not included as a reason on the 2021-22 MRS.

Table 9. Reasons reported by child care providers for price *decreases* on the 2023 MRS, with comparison to data from the 2021-22 MRS. Note—n=86 providers on the 2023 MRS reported having both increased and decreased prices.

	2023 MRS (n=228 decreases, 4%, n=5,515 responses)			2021-22 MRS (n=206 decreases, 5%, n=4,491 responses)		
Reason*	**#**	**% of Providers with Increases**	**% of Providers with Responses**	**#**	**% of Providers with Increases**	**% of Providers with Responses**
COVID-19	104	45.6%	1.9%	159	77.2%	3.5%
To be more competitive	87	38.2%	1.6%	54	26.2%	1.2%
Decreased costs	37	16.2%	0.7%	29	14.1%	0.6%
Fewer children	27	11.8%	0.5%	61	29.6%	1.4%
More children	27	11.8%	0.5%	13	6.3%	0.3%
Other	34	14.9%	0.6%	54	26.2%	1.2%

*Reasons are not mutually exclusive. Providers could select any and all reasons for their rate increase or decrease.

Table 10. Number and percentage of providers reporting barriers to caring for children receiving child care assistance (also referred to as "subsidy" in the survey) on the 2023 MRS, with comparisons to the 2021-22 MRS and 2017-18 MRS.

	2023		2021-22		2017-18	
Are there barriers to caring for children receiving child care assistance?	**#**	**%**	**#**	**%**	**#**	**%**
No. There are no barriers.	4,027	75.4%	1,727	38.5%	1,033	27.6%
Yes. There are one or more barriers.	1,315	24.6%	2,764	61.5%	2,709	72.4%
	5,342		4,491		3,742	
Payment Issues*						
Takes too long to get paid	776	14.5%	1,225	27.3%	1,319	35.2%
Payment rates are too low	764	14.3%	1,791	39.9%	1,493	39.9%
County pays less than my rate	565	10.6%	1,471	32.8%	1,310	35.0%
Inconsistent subsidy funding	562	10.5%	1,086	24.2%	966	25.8%
County doesn't pay for holidays	527	9.9%	1,298	28.9%	1,293	34.6%
County doesn't pay for absences	399	7.5%	1,440	32.1%	1,505	40.2%
Any payment issues	**1,136**	**21.3%**	**2,483**	**55.3%**	**2,390**	**63.9%**
DSS Communication Issues*						
Hard to talk to anyone at the county	511	9.6%	968	21.6%	1,109	29.6%
Don't know if subsidy is authorized when care starts	456	8.5%	686	15.3%	1,313	35.1%
Paperwork	423	7.9%	868	19.3%	879	23.5%
Don't have timely notice when case closes	332	6.2%	682	15.2%	1,271	34.0%
Any communication issues	**887**	**16.6%**	**1,630**	**36.3%**	**2,059**	**55.0%**
Family Issues*						
Parents not paying family share	392	7.3%	813	18.1%	1,054	28.2%
Subsidy ends and kids leave	481	9.0%	1,025	22.8%	1,364	36.5%
Any family issues	**663**	**12.4%**	**1,339**	**29.8%**	**1,717**	**45.9%**

*Specific barriers are not mutually exclusive. Providers could select any and all barriers.

Table 11. Providers self-reported participation in child care assistance (also referred to as "subsidy" in the survey), with comparison to the 2021-22 MRS.

	2023		2021-22	
	#	%	#	%
Of the children currently enrolled in your child care program, how is their care paid for?				
All private pay	1,197	20.4%	1,436	32.0%
All social services district	1,050	17.9%	567	12.6%
Both private pay and district	3,630	61.8%	2,488	55.4%
Of those who report being paid by the district, how many providers report they have a contract?				
District contract*	3,513	75.1%	2,133	69.8%
No district contract	1,167	24.9%	922	30.2%
Of those who report being paid by the district and charging a higher private pay rate, do you charge the difference between your rates and district rates?				
Yes	469	29.3%	423	32.9%
No**	1,131	70.7%	861	67.1%

* The percentage of providers that contract with districts is self-reported and unconfirmed.

**Most respondents who report having no district contracts also report that they do not charge parents the rates in excess of child care assistance payment rates.

Table 12. Narrow cost analysis model inputs for P5 Fiscal Strategies' 50-state Child Care Cost Model.

PROGRAM SIZE					
	Centers*			FDC	GFDC
	# of Classrooms	Child to Staff Ratio	Group Size	# of Children	# of Children
Infants – 0-12 months	1	4	8	1	2
Toddlers – 12-24 months	1	5	12	1	2
Threes	2	7	18	2	4
Fours	2	7	18	2	4
School Age (5-12 years)	1	10	20	2	4
BENEFITS					
Retirement %	3%				
Sick Time (# of days)	10				
Paid Leave (# of days)	10				
Health Insurance (Y/N)	Yes - BLS salary model				
	No - LW salary model *Health insurance is set to "No" here because the MIT LW calculator already includes health insurance premiums and out of pocket medical expenses.*				
ENHANCEMENTS					
Family Engagement (Y/N)	Yes				
Operating Reserve (%)	5%				

*The New York State defaults ("Licensing") for child to staff ratios and group size in the Child Care Cost Model were used for the narrow cost analyses presented in this report.

Table 13. Statewide results of P5 Fiscal Strategies' 50-state Child Care Cost Model for New York State using inputs described in Table 12 and run at two salary levels (Bureau of Labor Statistics, BLS, and MIT Living Wage, referred to here as NCA1 and NCA2, respectively). Note, these statewide cost estimates were then converted to the child care assistance payment rate county groups to facilitate comparison (shown in Tables 14-16 and Figures 2-9).

Provider Type	Age Group*	NCA1	NCA2
Center-based child care	Infants	$519	$561
	Toddlers	$437	$466
	3s	$362	$377
	4s	$362	$377
	School Age	$180	$184
Small home-based child care (NY registered FDC)	Infants	$348	$369
	Toddlers	$348	$369
	3s	$348	$369
	4s	$348	$369
	School Age	$184	$195
Large home-based child care (NY licensed GFDC)	Infants	$274	$288
	Toddlers	$274	$288
	3s	$274	$288
	4s	$274	$288
	School Age	$145	$152

*See figure 1 for a comparison of the age groups in the P5 Child Care Cost of Care Model and the market rates.

Table 14. Estimates of weekly per child costs for center-based child care from P5 Fiscal Strategies' 50-state Child Care Cost Model using two salary levels (Bureau of Labor Statistics, BLS, and MIT Living Wage, referred to here as NCA1 and NCA2, respectively) compared to the market rates established in 2024 (MR2024) by county cluster and age group.

County Group	Age Group*	MRS 2024	NCA1	NCA2	MR/NCA1	MR/NCA2
1	Infants	$484	$586	$634	83%	76%
	Toddlers	$444	$494	$527	90%	84%
	Preschool	$411	$409	$426	100%	96%
	School Age	$340	$264	$270	129%	126%
2	Infants	$385	$457	$494	84%	78%
	Toddlers	$365	$385	$410	95%	89%
	Preschool	$340	$319	$332	107%	102%
	School Age	$286	$205	$211	139%	136%
3	Infants	$320	$405	$438	79%	73%
	Toddlers	$300	$341	$363	88%	83%
	Preschool	$277	$282	$294	98%	94%
	School Age	$257	$182	$187	141%	137%
4	Infants	$500	$561	$606	89%	83%
	Toddlers	$450	$472	$503	95%	89%
	Preschool	$439	$391	$407	112%	108%
	School Age	$325	$252	$258	129%	126%

Abbreviations: MRS 2024 = child care assistance payment rates 2024; NCA1 = Narrow Cost Analysis at baseline quality level using Bureau of Labor Statistics salary level; NCA2 = Narrow Cost Analysis at higher quality level using MIT Living Wage salary level; MR/NCA1 = child care assistance payment rate divided by the NCA1; MR/NCA2 = child care assistance payment rate divided by the NCA2.

*See figure 1 for a comparison of the age groups in the P5 Child Care Cost of Care Model and the market rates.

Table 15. Estimates of weekly per child costs for small home-based child care (registered family day care, **FDC**, in New York) from P5 Fiscal Strategies' 50-state Child Care Cost Model using two salary levels (Bureau of Labor Statistics, BLS, and MIT Living Wage, referred to here as NCA1 and NCA2, respectively) compared to the child care assistance market rates established in 2024 (MR2024) by county cluster and age group. The Child Care Cost Model cost of care estimates are repeated for infant, toddler, and preschool to facilitate comparisons to the market rates, which are different for these age groups.

County Group	Age Group*	MRS 2024	NCA1	NCA2	MR/NCA1	MR/NCA2
1	Infants	$404	$393	$417	103%	97%
1	Toddlers	$400	$393	$417	102%	96%
1	Preschool	$380	$393	$417	97%	91%

APPENDICES

Appendix 1. Letter to child care providers introducing the 2023 Child Care Market Rate Survey. English version, followed by its Spanish translation.

Appendix 2. Survey questions for 2023 Market Rate Survey.

APPENDIX 1

NEW YORK STATE | Office of Children and Family Services

KATHY HOCHUL
Governor

SUZANNE MILES-GUSTAVE, ESQ.
Acting Commissioner

September 12, 2023

Dear Child Care Provider:

Every few years, the Office of Children and Family Services (OCFS) conducts a survey of the price of child care across the state of New York. This information is very important. It helps us to update payment rates for the Child Care Assistance Program (formerly known as child care subsidy program), so they reflect local prices.

This September, the Market Rate Survey Team will be sending all providers an electronic survey invitation by email that contains a link to the 2023 Child Care Market Rate Survey. The email will be coming from the sender "ocfs.sm.marketratesurvey@ocfs.ny.gov" and have the subject line, 2023 Child Care Market Rate Survey Invitation.

Please know this is a real survey from OCFS and it is safe to click on the link in the email. You can take this survey using any computer web browser or mobile device. The survey will take you about 15 minutes to complete. You do not have to complete the survey in one sitting. You can walk away and come back to it before the survey closes 8 weeks after the invitation is sent. But, once you submit the completed survey, it is closed and no longer available for edits.

The survey includes questions about child enrollment numbers, costs for providing child care, and the price you charge for child care. For questions about the price you charge for child care, please base your answers using the rates you charge to your "private pay clients," not the rates you charge for children whose care is paid for by the county department of social services (or in New York City by the Administration of Children's Services or Human Resources Administration).

The information you give us will be used to make any necessary changes to the child care assistance (subsidy) rates for your county. Your individual responses will not be shared with anyone other than the staff who will be data entering and processing the survey results. We may reach out (phone call or email) to some providers to verify the information entered in the survey.

If you have any questions, please send an email to: ocfs.sm.marketratesurvey@ocfs.ny.gov .

As a person who cares about children and child care, you understand how important it is for the payment rates for child care assistance to be current. Please consider participating in the survey when you receive it. THANK YOU!

Sincerely,

Nora Yates
Deputy Commissioner
Division of Child Care Services

NEW YORK STATE | Oficina de Servicios para Niños y Familias

KATHY HOCHUL
Governor

SUZANNE MILES-GUSTAVE, ESQ.
Activing Commissioner

12 de septiembre de 2023,

Estimado(a) proveedor(a) de cuidado infantil:

Cada ciertos años, la Oficina de Servicios para Niños y Familias del Estado de Nueva York (New York State Office of Children and Family Services, OCFS) dirige una encuesta sobre el precio del cuidado infantil en todo el estado de Nueva York. Esta información es muy importante. Nos ayuda a actualizar las tarifas de pago del Programa de asistencia para cuidado infantil (antes conocido como programa de subsidios para el cuidado infantil), para que se ajusten a los precios locales.

Este mes de septiembre, el equipo de la Encuesta de tarifas del mercado enviará a todos los proveedores una invitación a la encuesta electrónica por correo electrónico que contiene un enlace a la Encuesta de tarifas del mercado de cuidado infantil 2023. El correo electrónico será del remitente "ocfs.sm.marketratesurvey@ocfs.ny.gov" y en el asunto será: 2023 Child Care Market Rate Survey Invitation.

Tenga en cuenta que se trata de una encuesta real de OCFS y que es seguro hacer clic en el enlace del correo electrónico. Puede responder a esta encuesta desde cualquier navegador de Internet o dispositivo móvil. Le llevará aproximadamente 15 minutos completar la encuesta. No tiene que completar la encuesta de una sola vez. Puede irse y volver antes de que se cierre la encuesta, 8 semanas después de haber recibido la invitación. Pero, al presentar la encuesta completa, se cerrará y dejará de estar disponible para modificaciones.

La encuesta incluye preguntas sobre la cantidad de menores inscritos, los costos por dar los servicios de guardería y el precio que se cobra por ellos. Para las preguntas sobre el precio que cobra por el cuidado infantil, base sus respuestas en las tarifas que cobra a sus "clientes de pago privado", no en las tarifas que cobra a los menores cuyo cuidado paga el departamento de servicios sociales del condado (o, en la ciudad de Nueva York, la Administración de Servicios para Niños de la Ciudad de Nueva York o la Administración de Recursos Humanos).

La información que usted nos dé se usará para hacer los cambios necesarios en las tarifas de asistencia para cuidado infantil (subsidio) para el cuidado de niños de su condado. Sus respuestas individuales no se compartirán con nadie más que el personal que escribirá los datos y procesará los resultados de la encuesta. Es posible que nos comuniquemos (por teléfono o por correo electrónico) con algunos proveedores para verificar la información escrita en la encuesta.

Si tiene alguna pregunta, envíenos un correo electrónico a: ocfs.sm.marketratesurvey@ocfs.ny.gov .

Como persona que se preocupa por los menores y por el cuidado infantil, comprenderá la importancia de que las tarifas de pago de la asistencia para cuidado infantil estén vigentes. Considere la posibilidad de participar en la encuesta cuando la reciba. **¡GRACIAS!**

Sinceramente,

Nora Yates, Deputy Commissioner
Division of Child Care Services

APPENDIX 2

- *Survey questions for 2023 Market Rate Survey for licensed day care centers and permitted group day care programs in New York City.*
- *Most questions were identical for all modalities of care. Some specific survey questions were slightly different or not included for SACC programs (excluded questions about infants and toddlers) and home-based providers (for example, role of person completing the survey), as appropriate and relevant.*
- *Note, this set of questions does not include skip logic or all of the tool tips and formatting in the web-based version of the survey completed by providers.*

2023 Market Rate Survey: Day Care Centers (DCCs) and NYC Group Day Care (GDCs)

Welcome and Thank You!

This survey includes questions about:

- Child Enrollment numbers
- The Prices you charge for care.
- Your Costs for providing child care.

*Indicates a required question

ENROLLMENT

As of today, how many children are enrolled in your program for each age.

Enrollment Numbers - Infants (Up to 18 months of age)
*1. Total number of infants enrolled:

- Full-Time (30 hours or more in a week)
- Part-Time (Less than 30 hours in a week)

Enrollment Numbers - Toddlers (18 months to 36 months of age)
*2. Total number of toddlers enrolled:

- Full-Time (30 hours or more in a week)
- Part-Time (Less than 30 hours in a week)

Enrollment Numbers - Preschoolers (3 to 5 years of age)
*3. Total number of preschoolers enrolled:

- Full-Time (30 hours or more in a week)
- Part-Time (Less than 30 hours in a week)

Enrollment Numbers - School Age Children (6 through 12 years of age)
*4. Total number of school age children enrolled:

- After school only
- Before school only
- Before and after school
- During school breaks or vacation weeks

CHILD CARE SUBSIDY PARTICIPATION

*5. Of the children currently enrolled in your program, how is their care paid for?

- ONLY private-pay
- BOTH private-pay AND the County Department of Social Services - DSS (or in NYC by ACS, HRA, or DOE)
- Only the County DSS (or in NYC by ACS, HRA, or DOE)
- N/A. I don’t have any children enrolled at this time

*6. Of the children currently enrolled in your program, how is their care paid for?

- ONLY private-pay
- BOTH private-pay AND the County Department of Social Services - DSS (or in NYC by ACS, HRA, or DOE)

- Only the County DSS (or in NYC by ACS, HRA, or DOE)

CONTRACT/RATE AGREEMENTS

7. Do you have a contract or rate agreement with the County DSS (or in NYC with ACS, HRA, or DOE, i.e. Early Learn)?
   - Yes
   - No

8. Are the rates you charge private-pay families higher than the rates paid by the county DSS?
   - Yes
   - No

9. Do you charge county DSS families the difference between the DSS rates and your private- pay rates?
   - Yes
   - No

RATES (PRICES)

The next set of questions is about the rates (prices) that you charge families for care. Please keep in mind:
- We're looking for your regular rates for private pay families for weekday care (Monday to Friday). If you only care for children under a DSS contract, please enter those contract-based rates.
- DO NOT report sliding fee scales, discounted rates, extended care rates, or extra fees.
- Full-time is defined as 30 or more hours in a week.
- Part-time is defined as less than 30 hours in a week.

Rates for Infants, Toddlers, Preschoolers

*10. Does your program care for children who are not yet enrolled in school (infants, toddlers, and preschoolers?
   - Yes
   - No

*11. How do you charge/bill for infant, toddler, and preschool care? Check all that apply.
   - Monthly
   - Weekly
   - Daily
   - Hourly

Monthly Rates – Full-Time

12. What are your Monthly Full-Time (30 hours or more in a week) rates?
   - Infants ($ per month)
   - Toddlers ($ per month)
   - Preschoolers ($ per month)

Monthly Rates – Part-Time

13. What are your Monthly Part-Time (less than 30 hours in a week) rates?
   - Infants ($ per month)
   - Toddlers ($ per month)
   - Preschoolers ($ per month)

Weekly Rates – Full-Time

14. What are your Weekly Full-Time (30 hours or more in a week) rates?
   - Infants ($ per week)
   - Toddlers ($ per week)
   - Preschoolers ($ per week)

Weekly Rates – Part-Time

15. What are your Weekly Part-Time (less than 30 hours in a week) rates?
   - Infants ($ per week)
   - Toddlers ($ per week)
   - Preschoolers ($ per week)

Daily Rates

16. What are your Daily Rates for a Full-Day of care (6 or more hours/day)?
    - Infants ($ per day)
    - Toddlers ($ per day)
    - Preschoolers ($ per day)

Hourly Rates

17. What are your Hourly Rates?
    - Infants ($ per hour)
    - Toddlers ($ per hour)
    - Preschoolers ($ per hour)

Rates for School Age Children

18. Does your program care for school-age children enrolled in kindergarten or a higher grade?
    - Yes
    - No

19. How do you charge/bill for care for school-age child care? Check all that apply.
    - Monthly
    - Weekly
    - Daily
    - Hourly

Monthly Rates – School Age – Full-Time

20. What are your Monthly Rates for Full-Time (30 or more hours in a week) care?
    - School Age Children ($ per month)

Monthly Rates – School Age – Part-Time

21. What are your Monthly Part-Time Rates for care Before and/or After School?
    - For 1-2 hours a day, 5 days a week ($ per month)
    - For 3 hours a day, 5 days a week ($ per month)
    - For 4 hours a day, 5 days a week ($ per month)

Weekly Rates – School Age – Full-Time

22. What are your Weekly Rates for Full-Time (30 or more hours in a week) care?
    - School Age Children ($ per week)

Weekly Rates – School Age – Part-Time

23. What are your Weekly Part-Time Rates for care Before and/or After School?
    - For 1-2 hours a day, 5 days a week ($ per week)
    - For 3 hours a day, 5 days a week ($ per week)
    - For 4 hours a day, 5 days a week ($ per week)

Daily Rates – School Age – Full Day

24. What are your Daily Rates for Full Day (6 or more hours in a day) care?
    - School Age Children ($)

Daily Rates – School Age – Part Day

25. What are your Daily Part-Time Rates for care Before and/or After School?
    - For 1-2 hours a day ($)
    - For 3 hours a day ($)
    - For 4 hours a day ($)

Hourly Rates – School-Age

26. What are your Hourly Rates for School-Age children?
    - School Age Children ($)

RATE AND PRICING QUESTIONS

*27. Are there any barriers to caring for children with child care subsidies?
- Yes
- No

28. What are the barriers to caring for children with subsidies? Check all that apply.
- Takes too long to get paid
- Payments vary from month to month
- Payment rates are too low
- Hard to talk to anyone at the County
- County doesn't pay for holidays
- Extra paperwork
- County doesn't pay for absences
- Parents don't pay their family share
- County pays less than my rate Subsidy ends and kids leave
- I don't know when the subsidy case has closed
- I don't know if subsidy is authorized when care begins
- Other (please specify)

*29. Have you raised your prices in the past year?
- Yes
- No

30. Why did your rates go up? (Check ALL that apply)
- COVID-19
- Salary / Minimum Wage
- Health Insurance
- Insurance
- Building Costs / Rent
- Program Supplies Utilities
- Food Training
- Fewer Children in Care
- More Children in Care
- New Staff
- Quality Improvements
- Other (please specify)

*31. Have you lowered your prices in the past year?
- Yes
- No

32. Why did your rates go down? (Check ALL that apply)
- COVID-19
- To Be More Competitive
- More Children in Care
- Fewer Children in Care
- Decreased Costs
- Other (please specify)

COST ANALYSIS

This section will collect information about your program's costs.

33. What is your role at the program?
- Director or Assistant Director
- Admin Office Staff
- Teacher, Assistant, Floater, or Substitute
- Other (please specify)

34. How many staff typically work at your program in a week?
NOTE: You may have more staff cleared to work at your site, but some of them rotate between sites. We want to know how many actually work on-site in a typical week.

- 1-50 in groups of 5
- 51-100 in groups of 10
- 101-200 in groups of 25
- 201-400 in groups of 100

35. What is the average salary paid to a lead teacher in your program? (Please choose per year or per hour, then enter the dollar amount.)

- Per Hour
- Per Year

Enter the dollar amount below.

36. How many hours per week does a lead teacher work?

- Select numbers between 1-100

37. Does your program offer benefits to employees? Yes or No for each.

- Vacation Time
- Sick Days
- Health Insurance
- Retirement
- Other (please specify)

*38. Are you in the process of hiring staff?

- Yes
- No
- I don't know

39. Which position(s) are you hiring for? (Check ALL that apply)

- Director
- Assistant Director
- Lead Teacher
- Teacher Assistant
- Admin Office Staff
- Other (please specify)

*40. How is the day care space paid for? Choose one.

- Rent or Lease
- Mortgage / Own

For the following questions, please enter your total costs (monthly or yearly). Later we'll ask you how much of the home is devoted to your day care program.

41. Rent or Lease - total cost ($)

- Monthly Payment Total
- Yearly Payment Total

42. Mortgage (including principle, interest, taxes and insurance) - total cost ($)

- Monthly Payment Total
- Yearly Payment Total

43. How much do you pay for utilities (electric, gas, water) - total cost ($)?

- Monthly Payment Total
- Yearly Payment Total

44. Does your program receive funding (including funding in kind, such as free space in a church or school building) from ANY of the following? (Select ALL that apply)

- Head Start
- Early Head Start
- Pre-K or 3-K program operating in a public or private school

- Pre-K or 3-K program operating not on school grounds
- NYCHA (New York City Housing Authority) subsidized child care program
- Church, synagogue, mosque, or other religious institution
- DSS subsidy or in NYC ACS/HRA/DOE contract or voucher
- I do NOT receive funding
- Private fundraising
- Other (please specify)

45. How many hours per WEEK is the program open and caring for children?

*46. Are you currently operating at maximum capacity?
- Yes, every slot is filled with an enrolled child
- No, there are available slots
    - How many slots are available?

47. Do you currently have a wait list?
- No
- Yes: how many children are on the waiting list?

49 When during the year is the program open?
- The whole year
- School year only (September to June)
- Other (please specify)

50. Is there anything else you think we should know about the rates you charge or your cost of doing business?

This is the end of the survey - please click on Submit.

2023 encuesta de tarifas del mercado: Centros de Cuidado Infantil (DCCs) y centros de cuidado infantil en grupo (GDCs) de NYC

¡Bienvenido y gracias!

Esta encuesta incluye preguntas acerca de:

- Número de inscripciones de niños.
- Los precios que cobra por el cuidado infantil.
- Sus costos por prestar cuidado infantil.

*Indica una pregunta requerida

INSCRIPCIONES

Al dia de hoy, ¿Cuántos niños ha inscrito en su programa para cada edad?

Numero de inscripciones – Bebés (Hasta 18 meses de edad)

*1. Número total de bebés inscritos:

- Tiempo completo (30 horas o más en una semana)
- Tiempo parcial (menos de 30 horas por semana)

Numero de inscripciones – niños pequeños (18 meses a 36 meses de edad)

*2. Número total de niños pequeños inscritos:

- Tiempo completo (30 horas o más en una semana)
- Tiempo parcial (menos de 30 horas por semana)

Numero de inscripciones – Niños en edad preescolar (3 a 5 años de edad)

*3. Número total de niños en edad preescolar inscritos:

- Tiempo completo (30 horas o más en una semana)
- Tiempo parcial (menos de 30 horas por semana)

Numero de inscripciones – Niños en edad escolar (6 a 12 años de edad)

*4. Número total de niños en edad escolar inscritos:

- Solo después de la escuela
- Solo antes de la escuela
- Antes y después de la escuela
- Durante los recesos escolares o las semanas de vacaciones

PARTICIPACION EN UN SUBSIDIO DE CUIDADO INFANTIL

*5. De los niños inscritos en su programa ¿Cómo pagan por su cuidado?

- SOLO pago privado
- AMBOS pagos privados y el Departamento de Servicios Sociales (Department of Social Services, DSS) del condado (o en la ciudad de Nueva York por ACS, HRA, o DOE)
- SOLO el DSS del estado (o en NYC por ACS, HRA, o DOE)
- N/A. No tengo niños inscritos en este momento

CONTRATO/ACUERDO DE TARIFAS

6. ¿Tiene un contrato o un acuerdo de tarifas con el DSS del condado (o en NYC con ACS, HRA, o DOE, por ejemplo, Early Learn)?

- Si
- No

7. ¿Son las tarifas que les cobra a las familias de pago privado más altas que las tarifas que paga el DSS del condado?

- Si
- No

8. ¿Les cobra a las familias del DSS del condado la diferencia entre las tarifas del DSS y sus tarifas de pago privado?

- Si
- No

TARIFAS (PRECIOS)

La siguiente serie de preguntas es sobre las tarifas (precios) que les cobra a las familias por el cuidado. Tenga en cuenta lo siguiente:

- Nos interesa saber sus tarifas habituales para las familias de pago privado para cuidado entre semana (de lunes

a viernes). Si solo cuida a niños bajo contrato del DSS, ingrese esas tarifas basadas en el contrato.
- NO incluya escalas variables de tarifas, tarifas con descuento, tarifas de cuidados extendidos ni cargos extra.
- A tiempo completo se define como 30 horas o más a la semana.
- Tiempo parcial se define como menos de 30 horas a la semana.

Tarifas para bebes, niños pequeños y niños en edad preescolar
*9. ¿Cuida su programa a niños que aún no están inscritos en la escuela (bebes, niños pequeños y niños en edad preescolar)?
- Si
- No

*10. ¿Cómo cobra/factura el cuidado de bebes, niños pequeños y niños en edad preescolar? Marque todas las opciones que correspondan.
- Mensualmente
- Semanalmente
- Diariamente
- Por hora

Tarifas mensuales – Tiempo completo
11. ¿Cuáles son sus tarifas mensuales a tiempo completo (30 horas o más en una semana)?
- Bebés ($ mensuales)
- Niños pequeños ($ mensuales)
- Niños de edad preescolar ($ mensuales)

Tarifas mensuales – Tiempo parcial
12. ¿Cuáles son sus tarifas mensuales a tiempo parcial (menos de 30 horas a la semana)?
- Bebés ($ mensuales)
- Niños pequeños ($ mensuales)
- Niños de edad preescolar ($ mensuales)

Tarifas semanales – Tiempo completo
13. ¿Cuáles son sus tarifas semanales a tiempo completo (30 horas o más en una semana)?
- Bebés ($ semanales)
- Niños pequeños ($ semanales)
- Niños de edad preescolar ($ semanales)

Tarifas semanales – Tiempo parcial
14. ¿Cuáles son sus tarifas semanales a tiempo parcial (menos de 30 horas a la semana)?
- Bebés ($ semanales)
- Niños pequeños ($ semanales)
- Niños de edad preescolar ($ semanales)

Tarifas diarias
15. ¿Cuáles son sus tarifas diarias para un dia completo de cuidado (6 o más horas al dia)?
- Bebés ($ diarios)
- Niños pequeños ($ diarios)
- Niños de edad preescolar ($ diarios)

Tarifas por hora
16. ¿Cuáles son sus tarifas por hora?
- Bebés ($ diarios)
- Niños pequeños ($ diarios)
- Niños de edad preescolar ($ diarios)

Tarifas para niños en edad escolar
17. ¿Cuida su programa a niños en edad escolar inscritos en kindergarten o en un grado más alto?
- Si
- No

18. ¿Cómo cobra/factura el cuidado de niños en edad escolar? Marque todas las opciones que correspondan.
- Mensualmente
- Semanalmente
- Diariamente
- Por hora

Tarifas mensuales, edad escolar, tiempo completo
19. ¿Cuáles son sus tarifas mensuales por cuidados a tiempo completo (30 horas o más en una semana)?
- Niños en edad escolar ($ mensuales)

Tarifas mensuales, edad escolar, tiempo parcial
20. ¿Cuáles son sus tarifas mensuales a tiempo parcial por cuidado antes o después de la escuela?
- Por 1-2 horas al dia, 5 días a la semana ($ mensualmente)
- Por 3 horas al dia, 5 días a la semana ($ mensualmente)
- Por 4 horas al dia, 5 días a la semana ($ mensualmente)

Tarifas semanales, edad escolar, tiempo completo
21. ¿Cuáles son sus tarifas semanales por cuidados a tiempo completo (30 horas o más en una semana)?
- Niños en edad escolar ($ semanales)

Tarifas semanales, edad escolar, tiempo parcial
22 ¿Cuáles son sus tarifas semanales a tiempo parcial por cuidado antes o después de la escuela?
- Por 1-2 horas al dia, 5 días a la semana ($ semanales)
- Por 3 horas al dia, 5 días a la semana ($ semanales)
- Por 4 horas al dia, 5 días a la semana ($ semanales)

Tarifas diarias, edad escolar, dia completo
23. ¿Cuáles son sus tarifas diarias por cuidado infantil de dia completo (6 o más horas al dia)?
- Niños en edad escolar ($)

Tarifas diarias, edad escolar, dia parcial
24. ¿Cuáles son sus tarifas diarias a tiempo parcial por cuidado antes o después de la escuela?
- Por 1-2 horas al dia ($)
- Por 3 horas al dia ($)
- Por 4 horas al dia ($)

Tarifas por hora, edad escolar
25. ¿Cuáles son sus tarifas por hora para niños en edad escolar?
- Niños en edad escolar ($)

PREGUNTAS SOBRE TARIFAS Y PRECIOS

*26. ¿Existen barreras para cuidar a niños con subsidios de cuidado infantil?
- Si
- No

27. ¿Cuáles son las barreras para cuidar a los niños con subsidios? Marque todas las opciones que correspondan.
- Se tardan mucho en pagar
- Los pagos varían de un mes a otro
- Las tarifas de pago son demasiado bajas
- Es difícil hablar con alguien del condado
- El condado no paga los días feriados
- Mas documentación
- El condado no paga las ausencias
- Los padres no pagan su parte
- El condado paga menos que mi tarifa
- El subsidio termina y los niños se van
- No se cuando se cierra el caso del subsidio
- No se si el subsidio esta autorizado cuando comienza el cuidado

- Otro (especifique)
